

CUMBERLAND ROAD NORTH SOLAR PROJECT

Powering a Brighter Tomorrow

Cumberland Road North Solar Project, LLC is proposing an up to 149.5 megawatt (MW) solar photovoltaic (PV) generation facility and up to 75.8 MW 4-hour battery energy storage system (BESS) in Cumberland County, bringing many positive impacts to the local economy and community.

A solar project is an economic development opportunity for local tax jurisdictions to harvest new property tax revenue from sunlight without materially impacting schools, sewage, water, or emergency response services.

We are excited to be working in partnership with the Cumberland County community on an opportunity to host a clean, environmentally compatible, renewable energy generation facility.

CUMBERLAND ROAD NORTH SOLAR PROJECT

The Benefits of Going Solar in Cumberland County:

- New revenue for Cumberland County
- Direct and indirect economic impacts from project spending on goods, services and wages, primarily during construction
- Requires minimal water consumption during construction and operations
- Will not increase local traffic during operations or create a burden on municipal and education services (e.g. sewer, water, emergency services, schools, etc.)
- Clean, renewable energy has a reduced impact on the environment compared to other traditional options
- Provides a low cost, abundant, earth-friendly, sustainable generation resource to help stabilize electricity costs
- Offsets carbon emissions from fossil fuel power plants, and contributes to the diversification of the region's electricity grid
- Quiet energy generator without emissions
